

Southern Kern Unified School District

Form 470 # 230007672

RFP No. 2023-01

REQUEST FOR PROPOSAL

INTERNAL CONNECTIONS

Network Equipment

Addendum No. 1

Date: January 11, 2023

THIS AMENDMENT IS ISSUED AS ADDITIONAL INFORMATION AND/OR CLARIFICATION AS A RESPONSE TO REQUESTS FOR INFORMATION

REQUEST FOR INFORMATION:

Q. Please describe in greater detail the expectations of the below items listed in the scope of work.

-Installation Support

-Training covering the management console and using the switches' command line interface

A.

Installation Support: We intend to configure and install the switches ourselves. We need a point of contact in case we have any questions or run into any problems. If a switch using an OS other than ArubaOS-Switch is offered we will likely need additional support and/or training on getting the switches configured on the new OS.

Training covering the management console and using the switches' command line interface: These are two separate, online trainings. Management console training to cover the configuration of the console, as well as its interface and features. CLI training to cover the main commands used to manage the switches. We expect each training to be at least two hours long.

Q. Is the district asking for cloud or on site management platform solution? If the on site solution licenses are requested, please indicate the current management console the district is using

A. The District is open to onsite and cloud-based network management platforms. The district is not currently using a network management console.

Q. On page 12 of RFP, the district is asking for Management console with 110 licenses for all the District Switches.

1. What term does the district want with the licensing? 1,3,5 years?
2. The licensing for the management console depends on the exact switch model in use. Please provide the models and quantity of switches the District currently have in use?

A1. One year and 3 year options

A2. See below

Q. On page ten under scope of work the request is:

- Installation support
- Training covering the management console and using the switches' command line interface

Please define installation support that is requested. Page 12, shows the description as "configuration support" Please define the training requested.

A. See above

Q. Can the district clarify or expand on Installation Support?

A. See Above

Q. Does the vendor need to provide labor in the proposal for physical installation and configuration of the equipment?

A. No

Q. Please list Model and quantities of the existing 90 district switches

A.

Manufacturer	Model	Quantity
HPE Aruba	2530-24G-PoEP J9773A	6
HPE Aruba	2615-8-PoE	1
